## EDUCATION

### Northeastern University

Candidate for *Bachelor in Computer Science*

*Boston, MA*

*May 2028*

## TECHNICAL SKILLS

**Languages:** Python, Java, C++, C#, Kotlin, JavaScript, TypeScript

**Frameworks & Libraries:** React, Node.js/Express, React Router, MUI, Vite, Tkinter, Django (basics)

**Databases:** MongoDB (**Mongoose, Atlas**), PostgreSQL, MySQL

**Tools/DevOps:** Git/GitHub, REST APIs, Jest/JUnit, Linux, Heroku, GitHub Pages, JWT auth, Arduino

**Spoken Languages:** English (Native/Bilingual), Arabic (Native/Bilingual), French (Limited Working)

## PROJECTS

### Eternal Summary — On-Demand AI Summarizer

*Sep. 2023 - Nov 2024*

- Engineered an AI-driven web application leveraging Large Language Models (LLMs) to generate concise summaries of long-form content, improving information retention and reducing user reading time by 75%.
- Architected a robust backend to handle asynchronous API requests, ensuring low-latency responses and seamless integration between the frontend and third-party AI endpoints.
- Optimized data extraction efficiency by implementing advanced web-scraping sanitization, resulting in a 30% increase in summary accuracy across diverse web sources.

**Github Repo:** <https://github.com/Alitleis123/Eternal-Summary>

**Tech Stack:** Python, OpenAI API, Flask, BeautifulSoup, JavaScript, HTML/CSS

### Top Choice Realty

*Jun – Sep. 2025*

- Engineered and launched a full-stack real estate management web application to streamline client listings, agent workflows, and property data access for a growing brokerage.
- Built a scalable backend with RESTful APIs to manage properties, users, and transactions, ensuring secure authentication and efficient data flow between services.
- Designed a responsive, modern frontend interface optimized for usability and performance, improving agent productivity and client navigation experience.

**Github Repo:** <https://github.com/Alitleis123/topchoicerealty>

**Tech Stack:** React, Tailwind CSS, TypeScript, Framer Motion, GitHub Actions

## EXPERIENCE

### FrontEnd Developer Intern

*Jun – Sep. 2025*

*Top Choice Realty*

*New York, NY*

- Collaborated with cross-functional teams to troubleshoot UX issues and ship iterative UI improvements, reducing back-and-forth corrections and cutting common task completion time by ~20–30%.
- Built Python backend scripts to automate routine data cleanup/uploads, eliminating repetitive manual work and saving ~5–8 hours/week across operations.
- Designed and implemented a centralized client/agent data management system with cross-referencing and validation, reducing duplicate/inconsistent records by ~30–40% and improving lookup/retrieval speed by ~2–3×.

### Computer Technician Intern

*Jun – Sep. 2023*

*Robert DeFalco Realty*

*New York, NY*

- Set up and configured office workstations (OS installs, software provisioning, peripherals), completing ~20–30 device setups and cutting onboarding time from ~2 hours to ~45–60 minutes per device.
- Diagnosed and resolved day-to-day IT issues (performance, connectivity, printer/email), closing ~10–15 tickets/week with an average resolution time of ~30–60 minutes.

Implemented basic standardization (updates, backups, common configs) that reduced repeat issues by ~15–25% and minimized downtime during business hours.

## RELEVANT COURSEWORK

Fundamentals Of Computer Science 1 & 2, Object-Oriented-Design, Calculus, Artificial Intelligence, Discrete Structures, Game Programming, Programming in C++, Algorithms and Data Structures
